

Microscopy Products & Precision Positioning Technologies

Since 1955, based on our original branded industrial microscope “Tool Scope”, we have been actively engaged in designing, manufacturing and providing the optical measuring systems.

Tool Scope, Velnus, Zoom lens, Manual stage and MSS (Micro scanning Stage)

- Tool Scope is our original and signature product, with assorted types of stands for holding and focusing.
- Velnus is an inverted metallurgical microscope with built-in LED lighting.
- There are various C-mount zoom lens with specially designed stands.
- Manual stage.

- MSS is an automatic XY stage suitable for microscopes from major brands such as Nikon or Olympus. Our products have wide range of size up to 300x300mm.

Rollscope

- Rollscope is a metallurgical microscope that allows you to place the body directly on the sample for observation.
